1. HEAD AND NECK

The headrest will relieve the neck muscles and allow you to relax during long work at the computer.

2. BACK

Specially contoured backrest will give your back a proper position and prevent pain during prolonged use of the computer.

3. SPINE

The perfect position of the spine is guaranteed by a specially contoured, adjustable lumbar pillow.

4. HANDS AND ARMS

Rest your hands comfortably on the ergonomic soft armrests and let them rest despite long, uninterrupted work.

5. CORRECT POSITION OF THE WHOLE BODY

The metal structure ensures that the position of the chair will always be properly adjusted to the body, it also ensures stability and durability of the entire structure.
